Important Submission Elements – WW9

1. **Scientific Category:** All abstracts must be submitted to one of the following categories:

Clinical Science Category - includes research concerned with advancing patient clinical care. This includes original research, literature reviews and audits of safety and effectiveness of treatments and diagnostic tools, case reports and case series.

Basic Science Category - includes mostly lab-based research with the aim of improving knowledge and understanding of the physiology of health and of the disease process.

Social Science Category - includes research and academic study that deals with social, cultural and economic aspects and human behaviour.

2. **Titles:** Abstract titles are required to be 10 words or less. The title should be dynamic and conclusive, rather than descriptive, and should be entered in title case format, AP format. In general, you should capitalize the first letter of each word unless it is a preposition or article. Do italicize scientific names of organisms such as *streptococci* or *candida*. Titles should not be bold.

3. **Authors:** Each author should be added separately to the submission to ensure proper listing. The order of the authors can be modified at any time prior to the abstract deadline by contacting the organizer. IADR will not list each author's department in the program materials. One person must be identified as the Presenting Author. It is imperative to provide an accurate long-term email address for the Presenting Author. **Presenting Authors are required to login to the ScholarOne Abstracts submission site to confirm the accuracy of their information after the abstract is successfully submitted.**

4. Abstract Text:

- All abstracts should be 300 words or less.
- When composing your text, be sure to use a word processor in order to save your abstract in advance.
- Use the formatting functions available in the submission system to add in special characters. Do not include your title or authors in the abstract text — these items will be collected separately.
- Do not include references.
- If the abstract is based on research that was funded entirely or partially by an outside source, then be sure to enter the appropriate information (funding agency and grant number if applicable) when prompted during submission. You do not need to re-enter the information with your abstract text. However, all external funding **MUST** also be included in the presentation if accepted.
- Tables are permitted but should be simple and concise.
- Graphics/images are not recommended unless they are integral to the abstract and should be limited to no more than one or two.
- Special characters in the title or body of the abstract or in the co-author's names or affiliations should be entered into the system using formatting functions in the submission system to avoid formatting errors

5. Content of the Abstract: Titles, authors, authors' affiliations, and references are not included in the 300-word limit. The abstract must contain a brief statement of:

- a. Introduction/Background
- b. Methodology/Case Description
- c. Results/Discussion
- d. Conclusion

6. Other Items: the following information should be submitted:

- **Keywords:** All abstract submissions **may select up to five keywords** from a list. Two keywords are required. Keywords should be selected from Medical Subject Headings (MeSH) to be used for indexing of articles. See: <http://www.nlm.nih.gov/mesh/MBrowser.html> for information on the selection of key words.
- **Contact Information:** **IADR APR/WW9 will only correspond with the presenting author listed on the abstract regardless of who may have submitted the abstract.** Successful participation in the WW9 Workshop is contingent on the correct email address being provided for the Presenting Author. It is imperative to include a correct, long-term email address/phone number for the presenting author.
- **Presenting Authors are required to login to the ScholarOne Abstracts submission site to confirm the accuracy of their information after the abstract is successfully submitted.**

Common Abstract Submission Mistakes

- Failure to state objective and conclusion.
- Failure to state sample size and data.

- Excessive use of abbreviations.
- Excessive use of commercial product names.
- Typographical errors (authors can't change any text after the abstract deadline).
- Writing your abstract at the last minute.
- Work that is duplicative is not well received and you will only be asked to combine with another abstract or your abstract may not be accepted.

Make sure to show your abstract to a colleague prior to submission to avoid making common mistakes.

Word Limit Help

- Always hyphenate when possible (e.g., use “composite-resin restorations”, rather than “composite resin restorations”), and string together complicated phrases with hyphens.
- Abbreviate extensively [i.e., introduce abbreviations quickly and use them. Do not say hybrid zone but rather introduce hybrid zone (HZ) and then use HZ from that point onward].
- Always close spaces between numbers and units (e.g., instead of 30 mm, say 30-mm or 30mm; never leave spaces between numbers & standard deviations; and replace “30 ± 5” with “30±5”).
- Always use tables for the presentation of information when possible. Put units in headers and omit them from the rest of the matrix.
- Make sure that there is no inadvertent ‘dangling punctuation’ in the text, such as a comma or period that is not immediately adjacent to a word.
- Eliminate as many “articles” (a, an, the, ...) as possible.
- String together all of the steps in the Materials & Methods section so that you are not starting and stopping individual sentences with separate subjects, verbs, and adjectives [e.g., “The samples (n=10/gp) were etched (37% H₃PO₄), washed (15s), stored (37°C, 7d), conditioned (25°C, 10m), tested (0.1mm/m), and statistically analyzed (ANOVA, Tukey’s, p<0.05).”].
- Replace statements with equations [e.g., Instead of “10 samples were tested for each group” insert “(n=10)” into an appropriate sentence].
- Report all statistical differences with superscripts on results that can be attached rather than requiring separate statements.
- Construct tables to minimize the number of necessary cells.

The official notifications will be emailed on or about **July 15, 2025, to all accepted presenting authors.** The notifications will include presentation mode, date, and session time.
